

Workshop 6

Text Classification

Task 1

- Explore the given data set (Tweets.csv).
- If you work for an airline, how would you utilize this data set for your organization? Provide a discussion in a word document.

Task 2

- Implement a sentiment classifier using the given airline data set (Tweets.csv).
 - You are free to choose any pre-processing, feature extraction and classifier model.
- Evaluate your model in terms of precision, recall and F1 Score.
